Genovate's bioinformatics training

SINGAPORE-BASED Genovate Solutions Pte Ltd said it will offer training for the bioinformatics sector here from this month. It will offer courses in bio-XML, bio-Java, and bio-Perl. "Bioinformatics encompasses many aspects of mathematics, IT and biology to reveal patterns and links within and among sets of biological data," the company's CEO Anton Ravindran said. "The bioinformatics sector is projected to grow from US$468 million in 2001 to US$5.4 billion by 2010 globally." For details, visit *www.genovate.com*.
